

This concept map shows connections between the concepts in our ontology, with foundation in the three concepts; [401] Enterprise architecture, [410] Digital transformation and [460] Technical Debt.

Enterprise architecture is closely related to the overall [400] IT strategy of the business and will in turn affect many measurements, for example [301] KPI, and also impact the [321] Business Continuity level. In an IT strategy, sometimes undertaking Digital Transformations means getting some [460] Technical Debt which can lead to [140] Risk Management being important for maintaining the [321] Business Continuity.
