

Fig. 1 - Concept Map

Textual Description

The concept map integrates Enterprise Architecture (EA), Digital Transformation, and Technical Debt with key IT and business management concepts. EA guides Digital Transformation and mitigates Technical Debt. Digital Transformation, driven by IT Service Management (ITSM) and involving the COO, modernizes processes. Technical Debt impacts IT Strategy and exposes Cybersecurity risks. Governance of IT supports EA and oversees Project Management, ensuring organizational alignment. Privacy/Data Privacy, protected by Cybersecurity, is integrated into EA. Cybersecurity is essential for Digital Transformation and supported by Governance of IT. ITSM assesses Technical Debt for continuous improvement. Project Management, guided by the COO, directs Digital Transformation efforts.
