

[401] Enterprise Architecture (EA) guides [410] Digital Transformation (DT) by defining [342] projects. However, [410] DT can also influence [401] EA and create [450] technical debt. This [450] debt impact [401] EA can be related to [342] project decisions and/or overall [150] management.

[113] Governance regulates all these activities.

[250] Cybersecurity protects from vulnerabilities that can arise by [450] Technical debt, mostly related to projects.

[150] Management, which includes [490] consultants and change management, plays a crucial role throughout the process.
