The following diagram was made using creately since Cmap is not available to M3 Macbooks

In organizations, governance, risk management, and compliance (GRC) are vital for success. The Board of Directors (BoD) steers strategic direction, aligning culture with objectives. Compliance ensures adherence to regulations, while auditing validates efforts. Integrated into strategy, risk management safeguards reputation and fosters growth. Harmonizing governance, culture, GRC, and strategy is key to meeting stakeholder expectations and ensuring long-term success. It requires ongoing diligence, adaptation, and a commitment to improvement. Through effective GRC practices and strategic planning, organizations navigate uncertainties, driving sustainable growth.
