

Project Management ensures Business Continuity by planning for disruptions. IT Service Management (ITSM) supports it by maintaining critical IT systems during these disruptions. Governance, led by the Board of Directors (BoD), sets the strategic direction for IT and establishes standards. The Chief Information Security Officer (CISO) oversees information security strategy, reporting to the Board. Governance engages with Stakeholders who have an interest in the company's success. IT provides Project Management with resources and tools, ensuring projects are executed efficiently. Project Management adheres to Compliance requirements set by Governance. The CIO, part of ITSM, manages IT service delivery. Collaboration among these departments is crucial, illustrating organizational interconnectedness in achieving common goals.
