

[498] Technology Research supports the implementation of [430] Hyperautomation, a form of [401] Enterprise Architecture, which in turn supports [410] Digital Transformation. However, if not managed carefully, [430] Hyperautomation may lead to [499] Technical Debt, resulting from prioritizing fast delivery over perfect code. [490] Consultants assist in managing [499] Technical Debt and implementing [410] Digital Transformation, which can involve the adoption of [490] Cloud Services, guided by the [495] Cloud Adoption Framework. [410] Digital Transformation requires [498] Technology Research and is driven by a [420] Value Proposition. Furthermore, [498] Technology Research utilizes [497] Technology Readiness Levels to assess the maturity of technologies.
