In today's digital landscape, a well-defined IT Strategy (400) charts the course for success, but strong governance (EGIT 200) ensures it aligns with regulations and overall business goals. Streamlined processes (Integrated Management Systems 152) with smooth project management (343) keep things running efficiently. Cloud services (450) fuel Digital Transformation (410) initiatives championed by CxOs (190). KPIs (301) track progress towards those strategic goals, while Enterprise Architecture (EA 401) builds IT systems aligned with the initial strategy (400). Proactive management of technical debt (460) is crucial to avoid potential roadblocks and ensure the IT Strategy remains a recipe for long-term digital dominance.
