

99183 - Beatriz Militão

The conceptual map outlines the core components of business governance. [113] Governance is central to the map, influenced by the [111] Governing Body and overseen by the [139] CCO, which emphasizes [130] Compliance. The map denotes the role of [117] Corporate Culture and [118] Ethics influencing governance and strategic decisions ([120] Strategy). [140] Risk management is portrayed as a critical governance function, responding to [143] Risk Events and managing their [144] Consequences, in order to minimize impact. This creates a cycle linking [113] Governance, [120] Strategy, and [130] Compliance.
