

93691 - Beatriz Cruz Alves

The **IT Strategy** outlines priorities to ensure that **Governance of IT** aligns with business goals. **Governance of IT** ensures that **Enterprise Architecture** principles and standards are effectively implemented and adhered to across the organization.

Enterprise Architecture provides the strategic blueprint for **Digital Transformation** initiatives and manages the **Technical Debt**.

Digital Transformation enhances the **Value Proposition** and can exacerbate or alleviate the **Technical Debt**.

Competence Framework defines the **Competence** of people within the organization to, for example, perform the **Digital Transformation**.

CAF is a structured approach to cloud adoption. The **Cloud Service** is a key enabler of **Digital Transformation** to deploy new digital solutions and it's aligned with **EA** principles.
