The concept map places [401]EA at the core, guiding the alignment of technology with business strategies. EA is the blueprint for [410]Digital Transformation and identifies and manages [460]Technical Debt, which can hinder transformation efforts. [450]Cloud Services are central to digital transformation and are adopted and optimized using the [459]CAF. [480]AI, hosted on cloud services, is a key driver of digital transformation and helps in evaluating technical debt. [498]Technology Research keeps EA updated and drives [430]Hyperautomation, reducing technical debt while focusing on automating complex processes. [499]TRL ensures technology maturity, vital for hyperautomation, and [420]Competence improvement, which, in these areas, is crucial for leveraging AI and mitigating technical debt.
