

99075 - Guilherme Batalheiro

99069 - Francisco Guilherme

This concept map connects Enterprise Architecture (401), Digital Transformation (410), and Technical Debt (460) with other key business concepts. It shows how Enterprise Architecture helps manage Technical Debt and supports Digital Transformation. Digital Transformation requires new skills and advanced technology like Hyperautomation (430) and Identity Management (441). It also includes things like IAM (442) for security and follows rules like eIDAS (449) for legal identity checks. Meanwhile, Technical Debt can slow down Digital Transformation if not managed well. This map highlights how these concepts are all linked to help businesses operate smoothly and stay updated.
