

The concept map illustrates how [120] IT Business Strategy informs and guides [401] Enterprise Architecture (EA), which supports IT Infrastructure and [410] Digital Transformation. IT Infrastructure enables Modernization and supports [410] Digital Transformation, which, in turn, creates [450] Technical Debt and enhances Agility. Legacy Systems affect [120] IT Business Strategy, perform [410] Digital Transformation, and contribute to [450] Technical Debt. Agility, generated by [410] Digital Transformation, reinforces Innovation, which is overseen by [113] Governance. Modernization manages [450] Technical Debt and is managed by [113] Governance, which also oversees Innovation and manages [450] Technical Debt.
