

[401]Enterprise Architecture manages and assures that both **[400]IT Strategy** and **[120]Strategy (Business Organization)** are aligned with each other. It can also be used to identify key knowledge assets and ensure the IT infrastructure supports knowledge sharing, supporting **[402]Knowledge Management**. This last one supports the development of **[420]Competence**, and the work of the **[113]Governance**.

[113]Governance provides context for the **[120]Strategy (Business Organization)** and both are provided advice by **[490]Consultants**.

[400]IT Strategy provides a roadmap for **[410]Digital Transformation** and manages **[460]Technical Debt**. The second one influences the effectiveness and difficulty of implementing the first one, which can be performed on key technologies identified by **[498]Technology Research**.
