

Enterprise Architecture decisions may contribute to Technical debt. EA presents signature-ready recommendations to improve Processes. They are composed of Strategies.

Technical debt is the implied cost of using Short-Term Solutions. These Solutions will lead to Business Disruptions and may be employed as quick fixes during the early stages of Digital Transformation. Business Disruptions can interrupt or alter existing Processes

Digital Transformation is one of many Processes. This process exploits IT to create a robust Digital Business Model shaped by strategies. These Processes are useful to achieve Business Outcomes.

Business Outcomes are enabled and optimized by Enterprise Architecture. Strategies support Digital Transformation.
