

## Essay 4 - IT Strategy

Enterprise Architecture (EA) provides guidance for Digital Transformation (DT), integrating AI and supporting Hyperautomation by standardising processes and managing Technical Debt. EA aligns Technology Research with strategic goals and designs Hybrid Cloud environments, ensuring secure Cloud Service integration. DT drives innovation, optimises processes, and upskills the workforce, leveraging AI and Hyperautomation while managing Technical Debt. Effective Talent Management (TM) ensures expertise for secure CIAM integration. Artificial intelligence (AI) is dependent upon hybrid cloud infrastructure provided by cloud services, which also supports hyperautomation. Technology research informs best practices, identifying skills for secure CIAM management.
