

Essay 4 - IT Strategy

[401] Enterprise Architecture (EA) is part of [400] IT Strategy. Its quick response to disruptions helps mitigate future [450] Technological Debt. Additionally, [401] EA makes signature-ready proposals for [410] Digital Transformation.

[410] Digital Transformation implements modernisation processes like [430] Hyperautomation, through the use of tools like [480] Artificial Intelligence (AI). These processes can often rely on [440] Electronic Identity, whose use is overseen by [442] Identity and Access Management (IAM).

Moreover, proper [498] Technology Research contributes to [410] Digital Transformation, and its maturity during the acquisition phase is estimated by the [499] Technology Readiness Level.
