

[321] **Business Continuity** reflects [159] **Organizational Maturity** (because a mature organization has well-developed continuity practices in place), and is facilitated by [343] **Project Management** and [300] **ITSM**. [300] **ITSM** ensures [343] **Project Management** and [321] **Business Continuity**, collaborates with [442] **IAM** for asset security and facilitates [410] **Digital Transformation**, which requires [246] **DPIA**. [246] **DPIA** enables [321] **Business Continuity** by assessing data protection risks. [343] **Project Management** extends into [310] **OT** (because projects often involve industrial processes controlled by OT systems) and supports [442] **IAM**. [410] **Digital Transformation** requires [246] **DPIA** and is evaluated through [301] **KPIs**, necessitating [250] **Cybersecurity**, where [442] **IAM** plays a crucial role.
