

### Description of concept map:

The concept map focuses on safe digital identities inside a corporate environment. [449] eIDAS sets the standard for secure [440] Electronic Identification. This strengthens [442] Identity and Access Management within a business, ensuring only authorized users access resources. This also aligns with the IT infrastructure built on [401] Enterprise Architecture principles, which translates a solid [400] IT Strategy into action. Thereby a secure digital environment that supports business [120] Strategy and [410] Digital Transformation through informed decisions ([420] Knowledge Management) is created. However, [460] Technical debt can slow progress. In short, a strong digital identity ecosystem aligns with overall business [120] Strategy.
