

## 99306 – Pedro Ricardo Mateus

[401] Enterprise Architecture (EA) acts as the foundation for [410] Digital Transformation, modernizing processes but creating potential [460] Technical Debt. [120] Business Strategy guides these initiatives, ensuring alignment with goals. [220] Data Protection and [240] Privacy are essential for compliance and protecting information, critical for trust and legal adherence in the IT strategy. [250] Cybersecurity and [251] SOCs safeguard the IT infrastructure, crucial for protecting assets and strategic integrity. Adopting [450] Cloud Services can influence [460] Technical Debt through efficiency gains. [140] Risk Management (GRC) ensures threats to the IT strategy are identified, assessed, and controlled, improving overall resilience.
