The concept map depicts the topic of business governance. [104]Stakeholders, the people with interests in a business are reassured by effective [113]governance, which in turn establishes principles and rules and provides a framework for [150]management.

[190]CxOs oversee governance and ensure [130]compliance requirements. Said compliance is achieved by the CxOs through [140]risk management, which is a form of [122]strategy influenced by the CxOs and stakeholders that defines the company's path.

The level and quality of a strategy can quantify the [159]maturity of a business, which is a metric of effectiveness of the [100]organization. The way it works can identify the values of [117]corporate culture as shaped by the management, which can influence stakeholders' views on the bussiness.
