The conceptual map illustrates the interrelation between ten essential concepts in IT strategy. [401] Enterprise Architecture is central, connecting to [120] IT Governance to ensure the IT structure supports business objectives. [410] Digital Transformation is linked to [250] Data Analytics and [200] Cloud Computing, reflecting the importance of data and cloud technology in digital transformation. [450] Technical Debt shows the relationship with [300] Cybersecurity, highlighting how short-term compromises can impact security. [104] Stakeholder is crucial in all areas, ensuring the alignment of IT initiatives with stakeholders' needs. IT governance and infrastructure ([350] IT Infrastructure) support enterprise architecture, while business process management ([150] Business Process Management) promotes operational efficiency.
