Short description
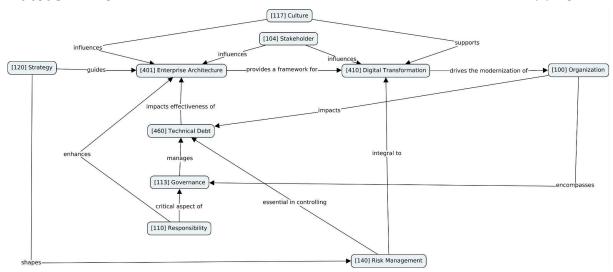

The concept map illustrates the interconnectedness of [401] Enterprise Architecture, [410] Digital Transformation, and [460] Technical Debt within an organization. [401] Enterprise Architecture provides the framework for [410] Digital Transformation, aligning it with the organization's [120] Strategy and optimizing the [100] Organization / System. [104] Stakeholder requirements shape both architecture and transformation efforts, while [113] Governance (GRC) ensures alignment and oversight. [110] Responsibility / Accountability is crucial in managing [460] Technical Debt, influenced by [140] Risk Management. [117] Culture supports transformation, and [120] Strategy guides architecture and transformation, all within an integrated organizational context.
