Essay 4 - Conceptual Map
Francisco Sanchez 99071
João Marques 99092

Governance of IT creates an IT Strategy that is used by Enterprise Architecture to propose signature-ready recommendations for adjusting policies and projects to Project Management. Project Management implements an IT Strategy to manage Projects and oversee their Quality. Digital Transformation, which is supported by Enterprise Architecture, improves both Compliance and Quality and reduces Technical Debt. Projects with reduced Quality have Vulnerabilities and create more Technical Debt, which can lead to even more Vulnerabilities.
