[401] Enterprise Architecture can be seen as a part of **[300] IT Service Management**. Enterprise Architecture enables **[430] Hyperautomation** through its structured approach and supports **[410] Digital Transformation**. Digital Transformation in turn makes several previously offline services possible in the digital space, such as **[450] Cloud Services** and **[443] Digital Wallets**. **[460] Technical Debt** can be outsourced or internally handled by **[490] Management Consultants** and depend heavily on **[498] Technology Research** to learn what future issues may arise. One way this can be measured is by **[499] Technology Readiness Level**.
