# Security and Management of Information Systems

111440 Viktoria Malikova

Essay 4 – IT Strategy

1 – Conceptual Map

The conceptual map integrates [401]Enterprise Architecture, [410]Digital Transformation, [450]Technical Debt, [440]Electronic Identification (eID), and [449]eIDAS, highlighting their interrelationships. [401]Enterprise Architecture supports [410]Digital Transformation and manages [450]Technical Debt. It integrates [440]eID and is enhanced by [449]eIDAS regulations. [104]Stakeholders influence [401]Enterprise Architecture. [410]Digital Transformation affects [450]Technical Debt, is enabled by [308]Cloud Computing, supported by [325]Data Management, and ensured by [207]IT Governance but hindered by [451]Legacy Systems. [440]eID is regulated by [449]eIDAS, which secures [401]Enterprise Architecture. [207]IT Governance manages [450]Technical Debt, often caused by [451]Legacy Systems.
