Simão Silva – 99329

In this concept map, I have decided to relate the topics of [401] Enterprise Architecture, [410] Digital Transformation and [460] Technical Debt with other topics, mainly related to IT. I start by associating [401] Enterprise Architecture with [400] IT Strategy, as these are two very closely related concepts. [400] IT Strategy defines what policies of [410] Digital Transformation exist, which in turn is related to many concepts: [430] Hyperautomation, [480] Artificial Intelligence, IT Infrastructure, [460] Technical Debt and [262] Outsource. We can also see that [460] Technical Debt is closely related to Digital Transformation and IT Strategy (bad policy in these areas can lead to it). Lastly, I decided to relate Outsource with [263] Managed Service Provider and [450] Cloud Services.
