# 99065 – CMAP - IT Strategy

This CMMap outlines the intricate relationships within enterprise architecture (EA), digital transformation (DT), governance (GRC), technical debt (TD), risk management, compliance, business models, IT strategy, organizational maturity, and stakeholder involvement. EA drives IT strategy, aligns with business models, and reduces technical debt. DT aligns with IT strategy, requires governance, and transforms business models. TD influences IT strategy and organizational maturity. Governance involves stakeholders, ensures compliance, and is supported by risk management. Compliance protects stakeholders. Organizational maturity enhances risk management. Stakeholders influence business models.
