This concept map shows how [321] Business Continuity, [343] Project Management and [300] IT Service Management connects to each other and other related and relevant concepts like [140] Risk Management, [260] Providers and [150] Management.

It draws connections that illustrate the fact that [321] Business Continuity heavily depends on not having too many [141] Vulnerabilities resulting, for example, from poor [303] Service Level Agreements or [140] Risk Management related to [260] Providers. On the left hand side, connections are drawn between [150] Management who chiefly has control over [343] Project Management.

Also, having strong [321] Business Continuity could be a strong indication of a healthy business and therefore there is a conceptual relation between it and [301] KPI.
