99075 - Guilherme Batalheiro

Business Continuity [321], and **Project Management [343]** within organizational frameworks. At the core lies **IT Service Management [300]**, encompassing **Key Performance Indicators (KPIs) [301]**, **Quality [302]**, and facilitating **Service Level Agreements (SLAs) [303]**. **Business Continuity [321]**, required by **IT Service Management [300]**, necessitates **Business Impact Analysis [322]**. **Project Management [342]** integrates with **IT Service Management [300]**, executing **Projects [342]**, and employing **Application Migration [350]** strategies. These components form a cohesive framework, ensuring efficient service delivery, continuity, and project execution within organizations.
