**97023 Lourenço Ponces Duarte**

The concept map shows how various components interact within digital transformation and enterprise architecture. **Enterprise Architecture [401]** supports **Knowledge Management [402]**, which enhances **Competence [420]** by providing access to necessary information. **Knowledge Management [402]** also aids **Digital Transformation [410]** by supplying crucial data. **Digital Transformation [410]** drives **Hyperautomation [430]** and relies on **Talent Management [423]** to develop needed skills. **Talent Management [423]**, in turn, depends on **Knowledge Management [402]** for learning resources, which further builds **Competence [420]**. **Hyperautomation** uses **Artificial Intelligence [480]** to improve processes, impacting the **Value Proposition [491]** by increasing efficiency and innovation.
